

Serving the Northwest for over 50 years.

Announcement

To: All FWAA Members and Associates
From: James F. Fitzgerald, Executive Director
Subject: AgChem Spill Response Training and NH3 Training - Query
Date: July 1, 2016

FWAA previously offered AgChem Spill Response training March 1-4, 2016, in Spokane, WA, but was unable to offer the training in Southern Idaho due to the unavailability of an instructor. As a result, we wish to query our membership to see if there is enough interest to warrant training this summer.

If you would be willing to send employees to either or both, please indicate which trainings are of interest and the approximate number of employees who may attend. Finally, please indicate if there is an interest in an early September training in the Willamette Valley area in Oregon.

Please review the proposed dates below, select your choice and submit your responses by close of business Wednesday, July 13th. Responses can be submitted via email to admin@fwaa.org, by fax to 509-465-5155 or by calling the FWAA office at 509-465-5055.

AgChem Spill Response (8 Hour Refresher or 24 Hour Initial)

- Southern Idaho: checkboxes for Late July, Early August with input fields for 8 Hour and 24 Hour attendance.
Oregon: checkbox for Early September with input fields for 8 Hour and 24 Hour attendance.

Ammonia Training (Anhydrous & Aqua)
